

From 12th to 15th of March Coelbo has been exhibiting in Milano Mostra Convegno Expocomfort 2024 all our range of PUMP DRIVERS.

The 43rd edition of MCE has concluded with more than 1,700 exhibitors and 121,000 visitors. These encouraging statistics underscore the positive Outlook for the market's future.

Throughout the fair, our stand was crowded with visitors interested in our products. Despite the event being only four days long, we could not be happier to meet and greet our clients and distributors from all over the world again in person. Unfortunately, the dates of the MCE coincided with Ramadan, and as a result, we were unable to meet with our Muslim clients. For this reason, we eagerly anticipate reconnecting with them at the next MCE.

Additionally, we presented our new products and modifications in operating conditions. These include:

- **The Panelmatic:** A modular electronic panel designed for the control and protection of 1 or 2 electric pumps.
- **DPR Master (Digital Pressure Regulator):** These units can be mounted in low-cost systems of 2 single-phase pumps, operating in duty-assist configuration with alternated starting sequence and constant pressure.
- **Speed Pool:** Our brand-new variable speed drive for swimming pool pumps. Available in two forms: wall-mounted and on-board configuration.

The response of the new products presented was very good and our water-tables and functional units were mandatory stops for news-hungry professionals, interested in our energy saving pump drivers. It also was presented the new catalogue where is summarized all our range of controllers.

Finally, it was a great satisfaction to see the most prestigious pump manufacturers exhibiting some of our products in the same exhibition.

Milano, ci vediamo in 2026!
